PRESS RELEASE

Countdown Begins: 34 Days to the Green ASC VET Final Conference at the European Parliament

The countdown has officially begun. In just 34 days, the Green ASC VET project will present its achievements at the European Parliament in Brussels, marking the successful completion of two years of international cooperation dedicated to improving vocational education and employment opportunities for autistic individuals.

Funded under the Erasmus+ Programme, Green ASC VET has brought together educational institutions, experts, employers, civil society organisations, and autistic individuals from across Europe with a shared goal of creating more inclusive pathways to education, training, and employment.

Over the course of the project, partners developed a wide range of innovative resources designed to support autistic learners and job seekers. Beyond the original project objectives, additional educational materials, digital tools, immersive learning resources, and practical guidelines were created to maximise impact and sustainability.

A key strength of the project has been the active involvement of autistic individuals throughout the development process, ensuring that the project outputs respond to real needs and lived experiences.

The Final Conference, taking place on 29 September 2026 at the European Parliament in Brussels, will showcase the project's achievements and provide a platform for discussing the future of inclusive vocational education across Europe.

As the conference approaches, Green ASC VET will launch a communication campaign highlighting its most significant results, success stories, and good practices developed throughout the project.

Project Coordinator Statement

"Green ASC VET is not only a project about vocational education for autistic individuals. It demonstrates how innovation, empathy, and international cooperation can create practical solutions for more inclusive education and employment. We are proud to present these achievements at the European Parliament."
