PRESS RELEASE

Green ASC VET Presented Its Results at the European Parliament: A New European Contribution to Inclusive Vocational Education

The Erasmus+ project Green ASC VET was successfully concluded with its Final Conference held on 29 September 2026 at the European Parliament in Brussels.

The event brought together representatives of European institutions, educational organisations, employers, civil society organisations, and autistic individuals to celebrate the project's achievements and discuss its future impact.

During the conference, participants explored a wide range of innovative resources, including career guidance tools, 360-degree career exploration videos, virtual learning materials, handbooks for educators and employers, and numerous additional outputs developed during the project.

Speakers emphasised the importance of creating educational and workplace environments that recognise diversity as a strength and provide equal opportunities for all individuals.

Green ASC VET has demonstrated that collaboration among education professionals, researchers, employers, organisations, and autistic individuals can lead to innovative, practical solutions with lasting European impact.

Although the project has officially come to an end, its results will continue to support education, training, and employment initiatives across Europe for many years to come.
